

Adopteq helps Penn Power Group migrate from Domino to Dynamics365.

About the Customer

Penn Power Group has been servicing the on and off highway equipment, transport refrigeration and power generation markets for over 50 years. As a major distributor and dealer for some of the most advanced green products in the world, we pride ourselves on providing service solutions to complicated problems.

About the project

The customer Penn Power Group was looking for the right solution to replace their legacy Lotus Notes Applications, and therefore decided to implement Dynamics365 to fit the modern needs

of their business. As part of this journey, they also required a modern, efficient and reliable product to move their data from Notes/Domino into Dynamics365, a solution that could handle applications with hundreds of thousands of documents. The migration project required a product that was highly secure and stable, but also to support migration and export of data consisting of Rich Text, Images, Attachments, crucial metadata etc.

All these requirements led the customer to choose Adopteq Migrator Plus for their migration from Domino to Dynamics365 for their 10 databases with over 500,000 documents.

Project at a glance

- 500,000 Documents
- 10 Databases
- 300,000+ attachments
- Energy Sector
- Migrated to Dynamics365 with no Downtime for the business.
