

Adopteq enables Teknos to Migrate from Domino to SharePoint & Power Apps

The customer, Teknos, a global coatings company. Who offer a wide range of paints and coatings for the manufacturing industry, building professionals and consumers, was looking for the right solution to Analyze, Migrate and replace their existing Lotus Notes/Domino Databases with new modern solutions such as SharePoint & Power Apps, as a result of recent investments in Microsoft365.

The migration project required a product that was highly secure and stable, including the capability to

handle complex Rich-Text fields, Attachments, in-lined pictures and more. All these requirements, together with great Transformation experience and development services by Adopteq to also rebuild and develop the new applications in Power Apps and SharePoint, led the customer to choose Adopteq and Migrator Plus for their entire Transformation from Domino for all their databases globally.

Project at a glance

- 15 + Databases in scope for migration
- Thousands of users involved
- Enterprise Coatings Company
- Migrated to SharePoint and Power Apps leading to massive increase in usage and productivity gains.
