Migration Modernized

Adopteq Migrator Plus™ is an up-to-date, scalable and efficient content migration software for transforming legacy Domino application content to new modern platforms.

Why you need Migrator Plus™

Adopteq Migrator Plus™ is the best content migration software to **help reduce your costs**, **risks and degraded user experience** by extricating your data from Domino.

1

Secure, reliable & efficient
We deliver the ability to validate migrated content down to document and field level, ensuring maximal security and fidelity with velocity migrations in mind.

2

All accessible content, metadata and attachments
We enable migration of applications with ease, whilst taking care of all rich text, in-line pictures, links, meta data, attachments and more.

3

Flexible catch-up capability
With Migrator Plus™ you are in control of whether to migrate all or subsets of data, including the capability to perform delta migrations.

Migrator Plus™ Capabilities

- **Multi-file type export** ability delivers Domino content to CSV, EML, XML and HTML giving you the power to migrate to any platform.
- **Content archival** using Migrator Plus™ archives to local and cloud file stores for easy access with our unique Archive Viewer Plus™ client.
- **Customizable control** of content migration from Domino to SharePoint/Teams.
- **Multi-language** character set support built-in.

FAQ's

How quickly can we migrate?

⇒ Migrator Plus™ can migrate thousands of documents per hour. How quickly your business adapts to change usually dictates the speed of your migration.

How do I know what to migrate?

⇒ Adopteq provides analysis consulting and the Investigator Plus™ product to uncover this valuable information.

⇒ Migrator Plus™ reveals the structure of where content is stored so no need to migrate unnecessary forms or fields!

The design and code of my application is complicated. How can you migrate it?

⇒ Content is king, not the complexity, the workflow or Notes views. Reimagine building a simpler, modern application based on todays business need, not how it was done in the past.

Can you help us unlock our archives from Domino?

⇒ Yes! Our unique way of converting NSF's to EML mean you can store archived content on any target file store, including cloud. EML retains the same look and feel as the original document whilst freeing your content from Domino and Lotus Notes!

⇒ Because we migrate to EML, mail content can also be easily migrated from Domino and found and stored the same way as your archived application content.
