

Analysis Datasheet

Investigator Plus

Investigator Plus delivers the right data metrics and data management you need. Consulting unlocks the value of the data. Combined, it delivers an optimized, accelerated path for your transformation.

Investigator Plus collects:

• Database Inventory

• Database Properties

- ◆ Usage data (who, when, what)
- ◆ Active contributors
- ◆ Roles
- ◆ Security
- ◆ Replicas

• Database content

- ◆ Used forms and fields
- ◆ Types of content and usage
- ◆ Attachment types and volumes
- ◆ Encryption
- ◆ Workflow in use
- ◆ Orphaned documents
- ◆ Content which cannot be migrated
- ◆ Readers & Authors

• Database design

- ◆ Template
- ◆ Hidden design
- ◆ Stored forms

• Custom Data

...and more!

Analysis is about questioning

to build an achievable transformation quickly, for the right reasons!

Amp up your Analysis with Investigator Plus

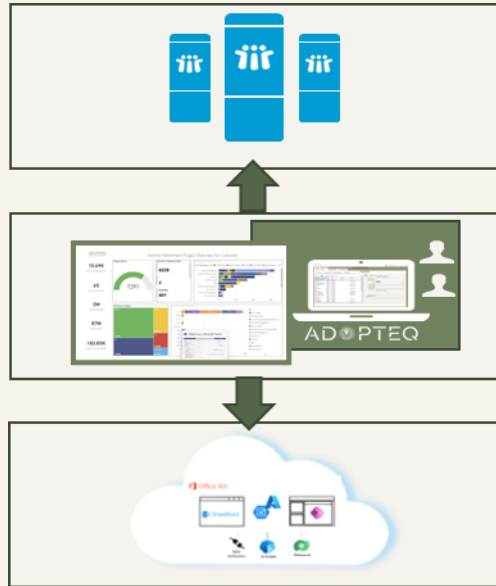

- 1 Scalable.** Regardless of the size of your estate, Investigator Plus's hub-spoke deployment, means all your analysis data is centrally stored in SQL.
- 2 Outcome Orientated** focus empowers you to make immediate actionable target decisions such as removal, archive, migrate and transform.
- 3 Customizable** data metrics (like data retention tags, privacy, company data like business unit) can be collected.
- 4 Agentless** collection means no security risk to your production.
- 5 Organized & Extensible** architecture offers a single location to manage recommendations, business feedback, transformation costs, application decisions paths and more.

Analysis Datasheet Investigator Plus

"We thought we knew the scope of our migration. We were not aware of these other databases which need to be archived before we can decommission Domino"

"We are so glad we took time to analyze. It saved us from migrating so many redundant applications."

Why re-create the past

when you can re-imagine the future?

FAQ's

Will Investigator Plus tell me where I should migrate?

⇒ Generally, business will determine application end points. Investigator Plus provides a platform to manage those decisions and report on datapoints.

How do I know what to migrate?

- ⇒ Investigator Plus will automatically highlight databases for removal and archival, further analysis will determine the remainder.
- ⇒ Analysis of the content and how the database is used will guide you to your best target platform.
- ⇒ Migrator Plus presents the structure of where content is stored so no need to migrate unnecessary forms or fields!

I've run an assessment before. Why do I need Investigator Plus?

- ⇒ Many assessments do not review the content level of a database and focus on the source complexity. We focus on content and how it is used. Reimagine building a simpler, modern application based on today's business needs, not how it was done in the past.
- ⇒ If you have collected the important datapoints, our experienced consulting team can advise and interpret your results accelerating your transformation journey.
