

Product Datasheet

MigratorPlus® for Access

Product Fast Facts

- Secure
- Centralized
- Intuitive
- Customizable content migration
- Fast Migration
- Data integrity
- Power Apps Ready

- ISO 27001 compliant
- Secure Software

Why MigratorPlus®?

Adopteq MigratorPlus® for Access **helps reduce your costs, risks and technical debt** by migrating your data from Access to Dataverse and Power Apps.

Populate your new Power App fast!

No need to start from scratch and have users work across multiple platforms. Be Power App ready and decommission Access quickly.

Migration Modernized

Adopteq MigratorPlus® for Access is centralized, and efficient migration software developed to migrate your important legacy Access database data to Dataverse and PowerApps.

1

Secure, reliable & efficient

It delivers the ability to validate migrated content down to item level, ensuring maximal security and fidelity with velocity migrations in mind.

2

All accessible content, metadata and attachments

Centralized migration of databases with ease, whilst taking care of all rich text, in-line pictures, links, meta data, attachments and more compatible with Dataverse and SharePoint.

3

Flexible catch-up capability

With MigratorPlus® for Access you are in control of whether to migrate all or subsets of data, including the capability to migrate new items as a delta.

MigratorPlus® for Access Capabilities

- ◆ Provides a secure and centralized environment for migration
- ◆ NO end-user driven migration
- ◆ Migrates legacy Access databases from 2007
- ◆ Migrates all compatible content, metadata and attachments to Dataverse tables and SharePoint online
- ◆ Reduces manual effort to migrate faster and build Power Apps more quickly
- ◆ Provides error checking prior to migration to reduce 'mystery' failure
- ◆ Stores attachments in SharePoint as standard

FAQ's

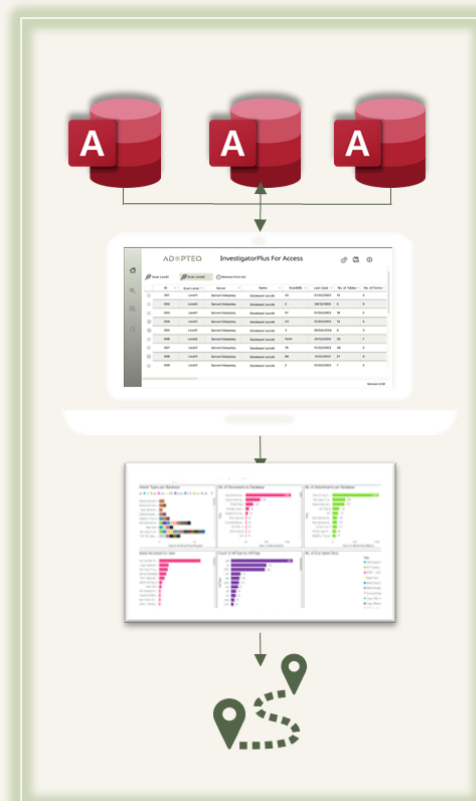

How quickly can we migrate?

- ⇒ MigratorPlus® for Access can migrate at high velocity. How quickly your business adapts to change usually dictates the speed of your migration.

The design and code of my database is complicated. How can you migrate it?

- ⇒ Content is king, not the complexity, the form design or VBScripts. With Power Apps, reimagine building a simpler, modern application for today's business need, not how it was designed in the past.

How can I tell what to migrate?

- ⇒ Adopteq provides **InvestigatorPlus for Access** product to uncover this valuable information.
- ⇒ MigratorPlus® for Access reveals tables and items so no need to migrate unnecessary data.

What Should I migrate?

- ⇒ In conjunction with understanding your Access database estate, it is imperative to know the importance of the data to determine whether a migration should be performed, the database archived or indeed decommissioned by working with the business.
